

# Move out of the data center with confidence

Achieve quick wins and build a flexible platform for future growth in AWS

*“My existing data center is inflexible and costing too much. I need to move like-for-like quickly and easily – but don’t know where to start”*

Whether you need to shut down your data center or simply looking to add operational agility and a more flexible commercial model, rehosting your application on AWS offers key advantages. But there’s a lot to consider.

**Moving like-for-like.**  
Three questions to consider:

- What outcomes am I expecting, and what approach is needed to make sure I achieve them?
- How do I know whether my apps are cloud-ready and can be quickly rehosted?
- How much will it cost to move, and is there funding available?

Ensono will assess your current application environment, validate your direction, build your business case, and help you secure funding. Then guide your migration – safely and at pace.

## 5-steps to lift and optimize

## Get a fast, confident start with Ensono

With experience supporting clients across retail, finance, government, and other highly regulated sectors, we know it can be difficult to break through the analysis paralysis and get started. Our AWS Migration Competency, deep application knowledge and repeatable processes take that pain away – moving you swiftly from initial assessment and business case development to a low-risk migration.

ensono®

## Featured service. Ensono AWS Optimization and Licensing Assessment (OLA)

We'll expertly guide you through an AWS Optimization and Licensing Assessment (OLA) to create your AWS migration strategy – exploring the potential cost savings, building your business case, and uncovering the quick wins. Then, when you're ready, we'll design and deploy your target cloud environment and begin your migration.
