

# Driving innovation in AWS

Champion change with a strategic move to AWS

*“I’m ready to move to AWS to modernize my applications environment – as part of a strategic move to transform my IT operations and my business”*

With transformation on your agenda, AWS is the right platform to support your modernization or cloud-first strategy – offering exciting new opportunities to drive DevOps and container-driven innovation. But major migrations are inherently complex and there is a lot to consider.

**A transformational migration.  
Three questions to consider:**

- How can my IT transformation model enable my business transformation objectives?
- How can I gain some quick wins while I’m on this strategic journey?
- How much will it cost to move, and is there funding available?

**We’ll work with you to understand your objectives, help shape your vision and then transform your applications environment in AWS to effect real and sustained change across your business.**
