

# De-risking mission critical migrations

Reduce risk and boost governance with an assured migration to AWS

*"I have tackled the low hanging fruit. Now I want to migrate my mission critical applications systems. But I'm concerned about the risks to my business"*

You've achieved the quick wins, now it's time to get serious. But downtime in ecommerce environments could cost millions, while any interruption of service in database-driven business systems may have major operational or governance implications. There's a lot to consider to avoid putting your applications, data and business processes at risk.

**A mission-critical migration. Three questions to consider:**

- How can I move my interdependent systems without compromising operations?
- What kinds of risks am I likely to encounter as I plan and execute my move to AWS?
- How can I ensure the highest levels of project governance?

Ensono has years of AWS migration experience. Our proven Cloud Transform framework mitigates risk and ensures projects are completed with zero unplanned downtime.

ensono®

**Featured service. Cloud Migrate**

Part of our Cloud Transform framework, we will categorize your apps and workloads by complexity. Simple apps will be lifted and optimized. As complexity rises so does our level of consultancy, planning and support: all to reduce risk and ensure the smoothest path to AWS.

## 5-steps to assurance

### STEP 1

Leverage a proven, structured framework to guide you through your migration process.

### STEP 2

Analyze current environment to identify and map workload and application dependencies.

### STEP 3

End to end project management provides a layer of governance across all migration activities.

### STEP 4

Deploy landing zone and 'pilot' application to validate and prove approach prior to execution.

### STEP 5

Defined control points and outcomes ensure assurance at every stage – before continuing to the next.

## Enjoy peace of mind with Ensono

Our AWS Migration Competency, deep application knowledge and a structured process guarantee an assured and tightly governed path into AWS. Leveraging our experience supporting clients across retail, finance, government, and other highly regulated sectors, we'll work with you to uncover the application dependencies and potential problem areas – addressing risk at every stage from assessment to execution and continual improvement.
