

# Optimizing AWS with a fully managed service

Continually review your cloud-based environment to evolve and innovate in AWS

ensono®

*"I've moved to cloud, but costs are still rising – and the problems haven't gone away"*

According to Gartner, 80% of companies that have made mistakes in their cloud adoption will overspend by 20% to 50%.<sup>1</sup> And it's not just a cost issue. Unmet business objectives are common in the cloud, and a lot of MSPs over promise and under deliver.

**Turning discontent to delight. Three questions to consider:**

- Were my initial expectations clearly defined (or realistic)?
- Are rising costs a consequence of over-capacity or something else?
- Did I get the right guidance at the start of my AWS journey?

**Our support doesn't stop with migration. If you've been let down by previous cloud projects, we can join you at any stage of your AWS journey – taking remedial action to get you back on track.**
