 - Strong relationships and privileged access to advanced support from AWS Business Solutions.
 - AWS Solutions Provider and Advanced Tier Services Partner.

Comprehensive Data & AI Assessment Report

Unleash your data's potential and propel your organisation towards AI readiness with our Data & AI Assessment Report. Gain actionable insights and strategic recommendations for a clear roadmap to harness the power of your data.

Discover the following key deliverables within our report:

Executive Summary:

Gain a comprehensive overview of the engagement scope, with tailored recommendations addressing your unique business objectives. Benefit from Ensono's expert analysis and insights, setting the stage for impactful outcomes.

Current State Assessment:

Immerse yourself in high-level diagrams and documentation of your existing analytics and IoT environment. Identify business risks, concerns, and areas requiring attention in Cloud Governance, enabling proactive mitigation strategies.

Data Modernisation Strategy:

Receive actionable recommendations to uplift your data platform and reporting capabilities. We provide recommended practices and toolsets based on your current state assessment, leveraging AWS products and services.

AI Strategy:

Explore a detailed set of AI recommendations, including guidance on generative and advanced AI platforms and tooling. Incrementally adopt AI and unlock its transformative potential for your organisation.

Building Capabilities:

Consider various paths for upskilling your business users and platform stakeholders, empowering them to effectively leverage your data strategy.

Adoption Roadmap and Indicative Timeline:

Gain a tailored set of actionable next steps and timelines, designed to transition your business to the future state. Benefit from execution guidance, AWS cost consumption estimates, and a phased deployment schedule for seamless implementation.

Statement of Work (SOW):

Discover Ensono's proposed SOW for the next phase, whether it's a Proof of Concept or the implementation of your first use case. Rely on our expertise and support as you embark on your data-driven journey.

AWS Cost Consumption Estimates:

Access phased cost estimates aligned with the proposed deployment schedule, ensuring transparency and budget predictability as you optimise your data infrastructure.
