

Mainframe Optimisation:

Keeping mainframe at the core of transformation

89%

of IT and business decision-makers believe legacy technology is a barrier to digital transformation*

46%

believe changes to legacy systems would cause major business disruption

40%

believe legacy technology would be cost prohibitive to replace

Business Challenges

- Mainframe skills are becoming increasingly scarce and expensive
- Business agility is impacted due to lack of flexibility and scalability
- It is difficult and time consuming to update and optimise applications and workloads

CHALLENGES

Labour, system software and hardware

Punitive vendor commercials

Managing labour risk

Lifecycle issues

Planning horizons

Residual workload

CHALLENGES

Applications

Pressure to modernise

Modernisation scope

Methodology and tooling

Skills shortages

Business case and governance

Labour, system software
and hardware

ensono®

Phase 1: Insights Assessment

- Discover infrastructure and commercial requirements
- Review hardware, software and labour costs and move methodology
- Provide deliverables and recommendations
- Business case

Phase 2: Quick Win

- Switch to Remote Infrastructure Management (RIM)
 - Transfer of assets
 - Leverage software cost savings
 - Risk mitigation
- No migration
Virtual resource pool
Transition support

Mainframe Modernisation Ongoing Phases

Applications

Complete hybrid IT services

ONGOING PHASES

- Extensive mainframe services portfolio →
- Commercial and operational risk mitigation
- Broader hybrid IT services
- Application modernisation

Hosted at Ensono- cloud, dedicated, shared; Remote Infrastructure Management (RIM); Disaster Recovery; Linux on Z; Sunset services

Re-platform, re-purchase, re-host, re-architect, retire

Why Ensono?

For business leaders managing lots of complexity or disrupting the status quo, Ensono delivers complete Hybrid IT services and governance, from mainframe to cloud, tailored to each client's journey.

For over 46 years, mainframe management has been our core competency. We can manage mainframe processing either in your own facility, or in our secure data centres, providing hardware and software, as well as technical and operational support.

As an IBM Platinum Partner, the 4th largest global provider worldwide with MIPS under management, we can help you overcome your current challenges to reduce the cost of operating and maintaining your mainframe environment, enabling you to innovate.
