

Charting Client Success

Ensono delivers complete hybrid IT services and governance for insurance and financial services organizations across the world. Our services range from cloud to mainframe, and everything in-between.

We have the right skills, experience and services to overcome the challenges of your retiring workforce and aging IT environment.

Reducing Legacy Reliance

A \$25 billion energy company chose Ensono to handle increasing workloads, drive down costs and reduce its mainframe footprint.

The result: Increased workload and support consolidation, reduced IT-related capital expenditure, reduced reliance on mainframe.

Mainframe Refresh and Migration

One of the largest mutual life insurance companies were challenged with end-of-life legacy IT infrastructure, an outdated data center and an aging workforce.

The result: Ensono established Remote Infrastructure Management (RIM) support to transition to a data center in proximity to the client's critical latency-sensitive applications – delivering a fully managed solution.

Addressing Skills Shortages

Faced with the retirement of much of its mainframe team, Ensono's remote management services ensured mission-critical applications at this globally acclaimed hospital remained fully supported.

The result: Uninterrupted patient services, expanded capacity, 15% increase in transactions and \$300K saving in software.

Insurance Transformation:

Time for a change?

With the pressures for Digital Transformation growing in the insurance sector, and against the backdrop of digital upstarts flooding the U.S. insurance market, this comprehensive Forrester report assesses how changing customer behaviors, will impact the whole insurance value chain from identifying insurance needs, determining price and underwriting risk through to selling policies, providing customer support and settling claims.
