

Ensono Windows Virtual Desktop Managed Service

Building Virtual Desktop Infrastructure (VDI) without the costs

Microsoft Partner
Azure Expert MSP

The Ensono Windows Virtual Desktop Managed Service puts you in control – dynamically scaling to effectively manage

costs and demands of a remote workforce while delivering a highly secure environment to protect your organization and its data.

Construct your environment

Simplify management, reduce costs

Taking advantage of Microsoft's access layer components, our comprehensive Desktop as a Service (DaaS) model delivers the agility, control and availability you need to adopt with confidence.

Windows Virtual Desktop

Is Windows Virtual right for you?

Are you ready to embrace the business benefits of a modern, flexible and lower-cost VDI?

Start with a Microsoft funded Proof of Concept – get in touch today at info@ensono.com

ensono[®]

Business drivers for Windows Virtual Desktop

- Secure Bring Your Own Device and remote connect across your enterprise
- Significant cost savings through Windows 10 multi-session and M365 plan licensing compared to other VDI options
- Scale up and down to align Opex to business usage

Optimize and manage with Ensono

- Cost control through a fully managed DaaS
- Rapid application delivery, patching and upgrades
- Integration with existing on-premise and cloud apps and resources
- Proactive security, multi-factor authentication, data protection and compliance
